# Jalpa Vadhiyara

6352940390 | vadhiyarajalpa4@gmail.com | Ahemdabad, India

## Professional Summary

---

Full Stack Developer with knowledge of Python, JavaScript, React.js, HTML, and modern web development practices. Passionate about building responsive, user-friendly web applications with clean, maintainable code. Eager to apply problem-solving skills and continuously learn new technologies while contributing to innovative software development projects.I have also knowledge about Machine Learning.

## Technical Skills

---

**Programming Languages:**
JavaScript,, Python, SQL, HTML5,

**Full-Stack Development:**
React.js, Node.js, Express.js, MongoDB, MySQL,RESTful APIs

**Artificial Intelligence & Machine Learning:**

Machine Learning, Deep Learning, Supervised & Unsupervised Learning, Scikit-learn, Pandas, NumPy, SciPy, Data Preprocessing, Feature Engineering, Model Evaluation

**Tools & Technologies:**
Git, GitHub, VS Code, Postman

**Core Competencies:**

Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Software Development Lifecycle (SDLC), Problem Solving,API Integration

## Education

---

**GU University** Ahemdabad,India

*BSC Computer science and information Technology (6.5* ***CGPA*** *)* Jun 2023-may 2026

## Projects

---

### Full Stack Developer Project

**Smart Notebook System:-**

**Description**: - Developed a cloud-based digital notebook platform allowing users to create, store, and manage notes efficiently Deployment.

**Role:** Full Stack Developer with technologies MongoDB,Express.js,react.js and node.js.

**Github Link:-** https://github.com/vadhiyarajalpa4-cyber/SmartNotebookSystem.git

**Inventory Management System (IMS) :-**

**Description:** Designing a comprehensive system featuring role-based access control for Admin, Manager, and Staff roles.

**Key Features**: Developed multi-functional dashboards tailored to specific user permissions and system requirements.

Technologies Used: MERN Stack (MongoDB, Express.js, React.js, Node.js)

**Github Link :-** https://github.com/vadhiyarajalpa4-cyber/Inventory1.git

**Social media management** :-

**Description:**Developed a full-stack social media web application that enables users to create accounts, log in securely, create and manage posts, like and comment on posts, and connect with other users. Built a responsive and interactive user interface using React.js, while the backend was developed with Python to handle user authentication, database operations, and REST API services. Focused on delivering a secure, scalable, and user-friendly platform with efficient data management and real-time user interactions.

**Key Features**: Developed multi-functional dashboards tailored to specific user permissions and system requirements.

Technologies Used: MERN Stack (MongoDB, Express.js, React.js, Node.js)

**GithubLink:- https://github.com/vadhiyarajalpa4-cyber/social.git**

**In React Ecommerce_Site:-**

**Description:-**

- Developed a React.js-based Product Management System with Add, Edit and Delete CRUD functionality.
- Implemented product details including name, price, quantity, sold quantity and category.
- Created category-wise sales tracking to display sold products for different categories.
- Built multiple pages including Home, Product, Category, About, Contact, Login and Register using React Router.
- Used React Hooks (useState, useEffect) for state management and data handling.
- Maintained and uploaded the project using Git and GitHub**.**

**Technology**:- React.js | JavaScript | HTML | CSS | Bootstrap | React Router | Git & GitHub

**Github Link:-** https://github.com/vadhiyarajalpa4-cyber/React_app.git

## AI/ML:-

**Customer Classification using KNN**

**Description:** Implemented a machine learning model to classify customers based on behavioural data using the K-Nearest Neighbours (KNN) algorithm**.**

**Focus**: Data cleaning, feature scaling, and model accuracy optimization**.**

**Technologies**: Python, Scikit-learn, Pandas, NumPy, MERN Stack

**Loan Approval Prediction**

**Description:**Developed a machine learning model to predict loan approval eligibility based on applicant financial and demographic data. Performed data preprocessing, feature engineering, handling missing values, and model evaluation and implemented classification algorithms to improve prediction accuracy and support decision-making.

**Technologies:** Python, Scikit-learn, Pandas, NumPy, streamlit

## Experience: -

**Full Stack Developer Intern(Remote)**

Company Name:-codealpha.com | | May 2026-July 2026 (1 Month)

Worked on web development projects. Assisted in software design and debugging. Collaborated with team members on development tasks. Gained hands-on experience in full-stack development.

**Full Stack Developer Intern (WFO)**

**Destiny Solution Private Limited | Ahemedabad,Gujarat**

- Develop responsive web applications using React.js, HTML, CSS, and JavaScript.
- Integrate frontend components with backend APIs and databases.
- Write clean, reusable code and debug application issues.
- Collaborate with the development team to implement features and improve application functionality.
- Use Git and GitHub for version control.
